Python Software Development | Machine Learning | Data Science | Data Automation

Professional Summary

Computer Science graduate with internship experience across AI governance testing, data science, and automation at KPMG India, Sopra Steria and DigiSys InnoSol. Experienced to build end-to-end data pipelines, deploy ML models, and generate actionable insights using Python, FastAPI, and modern data tools, with interest in large-scale data processing, machine learning, and time-series forecasting.

Education

SRM Institute of Science and Technology

B.Tech in Computer Science and Engineering

Aug 2022 – May 2026

CGPA: 8.2

Technical Skills

- **Programming:** Python, SQL, JavaScript, TypeScript, C++
- **Machine Learning and Data Science:** scikit-learn, XGBoost, LightGBM, CatBoost, Prophet, AutoARIMA, Feature Engineering
- **Deep Learning, NLP and CV:** PyTorch, TensorFlow, Keras, Hugging Face, YOLOv8, DeepLabV3+
- **Data and Backend Tools:** Pandas, PostgreSQL, MySQL, MongoDB, FastAPI, Streamlit, REST APIs, AWS
- **Visualization and Tools:** Power BI, Tableau, Plotly, Seaborn, ServiceNow, Git, GitHub, Microsoft 365

Internship Experience

DigiSys InnoSol Pvt. Ltd

Jan 2026 – May 2026

Software Development Intern

- Engineered robust pandas preprocessing pipelines that standardized multi-regional vendor risk data using structural sanity checks, dynamic feature imputation, and Min-Max normalization, ensuring high-fidelity metric evaluation.
- Developed a multi-agent AI orchestrator to automate artifact-to-question matching, streamlining sector-specific GRC workflows to generate evidence-backed draft compliance responses.
- Contributed to the design and validation of evidence-bound RAG flows, robust guardrail mechanisms, reliable state propagation, batch document processing, and retrieval-backed answer generation.

Sopra Steria

Jul 2025 – Nov 2025

Data Science Intern

- Worked on a CSV sampling engine for ServiceNow-style case datasets, focusing on hierarchical sampling logic, iterative balancing, configuration-driven execution, and a Streamlit-based interface for practical workflow use.
- Created flexible quota based-balancing workflows using Python and Pandas, improving consistency and reducing repeated manual work.
- Developed a Streamlit interface for validation, reporting, and stakeholder review, and proposed a PySpark migration path for future distributed processing.

KPMG India

Dec 2024 – Feb 2025

Software Development I Intern

- Built a forecasting model to predict crop yield trends, achieving $R^2 = 0.78$ and 22% lower RMSE compared to ARIMA baselines.
- Created a data pipeline using MongoDB and Pandas to organize location-based agricultural data for analysis and visualization.
- Cleaned, prepared, and evaluated datasets to support reliable forecasting workflows.

Projects

AgriFore: Crop Price Forecasting Platform

Dec 2025 – Apr 2026

Research Project – GitHub Link

- Built a crop price forecasting and analytics platform that combines market, production, and weather data to study district-level agricultural trends.
- Developed forecasting workflows using XGBoost and Prophet, with FastAPI and Streamlit used for backend services and user-facing dashboards.
- Added an AI-assisted query layer so users could ask questions about model outputs instead of manually searching through dashboards and reports.

LoanOne: Multilingual Loan Advisor

Oct 2024 – Nov 2024

Standard Chartered Hackathon Finalist – Top 5

- Built a multilingual loan advisory system that helped users check eligibility and understand suitable loan options.
- Combined LightGBM, FastAPI, React, and an interactive advisory layer to connect model results with .

CSV Forecast Engine

Dec 2024 – Jan 2025

GitHub Link

- Built a no-code forecasting tool that allows users to upload CSV files and generate predictions without writing code.
- Used Prophet and AutoARIMA with validation, preprocessing, and backtesting to make the tool reusable across different datasets.
- Designed the project as a repeatable analysis workflow rather than a one-time forecasting script.

Certifications

AWS ML Foundations, ServiceNow Certified System Administrator, ServiceNow Certified Application Developer, ML On-ramp, Deep Learning, Computer Vision Essentials, GitHub Foundations

Activities and Achievements

- **Leadership:**
 - MUN Society Council Affairs – Committee Head
 - Directorate of Student Affairs – Discipline Council Member
- **Volunteering:** Good Life Center
- **Achievements:** Standard Chartered Hackathon Top-5 Finalist, Smart India Hackathon Participant
